PROFILE

Software Engineer with a DevOps and Cloud background, now focused on backend systems, software architecture, and intelligent automation. Experienced in Python, Go, and C++, with a strong foundation in algorithms, data structures, and NLP.

Passionate about building scalable, production-grade systems with clean, maintainable code.

EXPERIENCE

○ Software Developer

Nunegal Consulting (Client: Inditex) | April 2024 to Present

Tech Lead for a team of 3 engineers building an internal Agentic AI Platform for Infrastructure automation.

- Built a full-stack system (FastAPI/Python, React) that functions as an autonomous DevOps agent (similar to Cursor IDE), enabling LLMs to inspect workspaces, edit files, and execute code.
- Implemented an Agentic Workflow using a Tool-use/MCP (Model Context Protocol) approach to orchestrate complex tasks: generating Infrastructure as Code (IaC), validating configurations, and automating Git workflows.
- Engineered the backend integration with multiple LLM providers and the core Inditex Data DevOps platform, centralizing infrastructure operations for 100+ engineers.
- **Impact:** Reduced the Data DevOps team's manual workload by 80%, successfully scaling the system to handle hundreds of concurrent requests.

○ Junior DevOps

VML The Cocktail (Client: Inditex) | Nov 2023 – April 2024

Worked on backend services and CI/CD pipelines to support large-scale data operations in the cloud.

- Automated Databricks interactive cluster deployments for the Analytics team, reducing technical friction and enabling custom deployment policies.
- Created reusable CI/CD pipeline modules in Python and Go.

○ DevOps Intern

VML The Cocktail | Jan 2023 - Nov 2023

Assisted with infrastructure automation and deployment for cloud-native services.

- Created various PoCs to integrate genAI into different client services such as semantic web searches or chatbots. Some of these PoCs were sold and continued.

SKILLS

Languages: Python, C++, JavaScript.

Frameworks/Libraries: FastAPI, Django, Flask, React, OTel, Pytest, GoogleTest.

Databases: Vector Databases, relational, non-relational, time-series.

CI/CD: Github Actions, Azure DevOps.

Cloud & IaC: Terraform, Azure, AWS.

Systems: Docker, Linux.

LANGUAGES

- Spanish - Native
- English - C1 (Advanced)

EDUCATION

- 42 School - Software engineering | 2022 - 2025
- Bachelor of Classical Music with violin | 2015 - 2019
